Child "Protective" Services

violations of Constitutional Rights

Accused criminals in danger of losing their freedom
are protected by constitutional rights:

Criminals have more
rights than parents!

- * speedy trial
- * public trial
- * impartial jury
- * information on nature and cause of accusations
- * the right to confront witnesses
- * compulsory process for obtaining favorable witnesses
- * the assistance of an attorney

Here's what parents in danger of losing their children get
from CPS and juvenile courts in most of the states,
including this one:

Civil litigants in danger of losing
20 dollars can get a jury trial.
Parents in juvenile court can't.

- * coerced to sign away rights with no trial
- * public not allowed to see what goes on behind the closed doors of juvenile court
- * no jury allowed at all, impartial or otherwise
- * information on accusations not given and the identity of the accuser kept secret
- * parents discouraged from bringing in witnesses in their favor - by their own court-appointed attorneys, who are really system-players, working for the very county that wants to take their children away forever!
- * too few good attorneys willing to prepare a real defense. Court-appointed attorneys overworked and underpaid - they meet their clients for the first time five minutes before court and "pretend to defend".

Where's the JUSTICE?

Knowing all this, how can you cooperate with the
destruction of American families?
