

Note from the Monday, April 30th Genealogy Group

Looks to me as a group we want to address some of the items listed on the "www.SVGG.info/Meeting" page. Ask or send a flyer to anyone you might think would like this type of sharing. Flyer located on the same "www.SVGG.info/Meeting" page.

Some software links, Betty sent me. Both are very good reviews

My suggestion: Do look through these sites and read what is there. These sites have a lot of info. In several different areas.

Also ask around, see if there are others here who can show you the software they are using and why they like it. I can show and walk you around "Legacy". I do not have any others loaded on my machines.

Genealogy software reviews:

<http://genealogy-software-review.toptenreviews.com/>

Here is another link with charts color coded.

http://en.wikipedia.org/wiki/Comparison_of_genealogy_software

There is stuff out there for MAC's (Apple).

from: Bp

Plans for May meetings, *unless we go astray.*

May 7th and 21st, Mondays from 1-3

I am making a *dummy* family tree we can use for this class. I'd like to show you how to upload a Gedcom file to Ancestry.com and how to down load a file from ancestry.

Basic entries for Genealogy Software. (will be on going)

Thoughts on organizing your files on the computer.

Maybe touch a little on paper files and organization.
