

Note from July 9th - Monday Genies

We mainly work on the how to enter names and dates in the software. We used "Legacy" software, but lot of the techniques can be use in most genealogy software. We walked those some short cuts and have a lot more to go through. I use the following training video from the "Legacy" web page.

<http://www.legacyfamilytree.com/tipsSourceSamples.asp>

Then click the "*training*" button on top tool bar. / then "*view video training*" / then "Legacy for Beginners (CD 1) - ***New for Version 7!***"

Watch a little video then work on your family tree, the watch some more. Going back and forth helps you learn and do.
