

Notes from 25th of June, 2012 Monday Genies

We did another "Case History" , with the group as a extension of the June 11th meeting. As a group we looked up sources or suggestions, coming up with census, mortality census, graves sites and county records, even possibility for a military site.

We went over again how to connect to the wiki web page from the LDS site: Go to www.svgg.info then to "Gen Links" (on the right column) to LDS Genealogy. Go To: Learn (top bar) / (bottom of page) "go to the wiki" /pick a subject or go to counties and state.

OR

Click HERE: https://www.familysearch.org/learn/wiki/en/Main_Page

Spend some time snooping around here.

Next we watched a video from Barrysblog on a color coding-file system, followed by a healthy discussion about filing, what we liked and what we didn't like. We all have great plans to reorganize our files or at least work on some changes.

The following is a PDF file on the coloring system that you can read or print if you like. It is a product from MyGenShare.com

http://barrysblog.mygenshare.com/newsletters/skillbuilder/newsletter_1/pdfs/Color-coded_Genealogy_Research_Filing_System.pdf

This site goes to About.com Genealogy. It has several sites to look at and glean info from. Take some time to look it over and maybe bring back something to share with the "Monday Genies". Interesting, but need some time here.

Next meeting is planned for Monday, July 9th. July 19th, 23rd and 30th the Library Room will be in use. We will have to find another day for the latter part of July or maybe met in the morning. Any ideas?
