

## Notes from the 21 May, 2012 Genealogy Time:

We walked through citing sources and where to find examples, plus how to organizing the "Master Sources List" beginning with state, county, town or surname.

Showed citing sources from the <http://www.LegacyFamilyTree.com> site. Also located on <http://www.SVGG.info> from the Genlink Page called "Legacy Family Tree Tips".

Examples of sources:

<http://www.legacyfamilytree.com/tipsSourceSamples.asp>

How to Handle Online Sources:

<http://www.legacyfamilytree.com/tipsOnlineSources.asp>

Advances Sources:

---

Shirley helped out with some nice web pages: Which I have updated to the SVGG/Genlink page.

Updated the Civil War, added Revolutionary War Records (that lead to several other Revolutionary sites) Nice page. I added Access which has lots, plus charts plus Native American. The Federal Land Record Patents and Archives was on the page. Added under Members' Favorites GenCircles and GenForum.

*Thank you Shirley for sharing these sites. They are really helpful.*

We review making Gedcom files, uploading, downloading and then opening in Legacy program. We were disappointed the gedcom would not carry photos attached to either the software or Ancestry.com.

Then Peggy walked us through an actual research project. Starting with a name and photo, Finding him on the census, finding his wife and daughter, his marriage and the daughter's marriage, Voter's registration, which gave description the man and his naturalization date and place. Finished with finding their burial place and photos of the tombstones.

The month of June we will meet Mondays June 11 and 25 at 1:00 at the Etna Library Meeting Room. June 11<sup>th</sup> we will be working on "Case Histories" each of us will bring a Case History or our Birck Wall with background, and the group will suggest and give ideas of places to look. This is a fun way to share and learn at the same time. Hope to see everyone then.

Any questions call: Peggy 467-3714
